### **Onecollect** ONECOLLECT STREAMLINED ACCOUNTS RENDERED PROCESSING

OneCollect is designed to streamline your accounts rendered management process, to save time and improve cashflow at your firm. The automated workflow system helps you process accounts rendered, allowing you to automatically send text or email reminders and schedule follow-up to take the hassle out of getting your firms' bills paid.

Keeping track of unpaid bills and accounts owed can be a time and energy consuming task which can stand between you and your firm's more pressing day-to-day tasks

OneCollect is designed to simplify the process of chasing debtors, to help improve cashflow and save time at your firm. It takes the legwork out of chasing unpaid bills by creating workflows, templated follow-ups and simplified processing.

Accounts rendered can be bulk or single-processed, saving time and allowing you to personalise communications where necessary. Reminders can be varied in intensity, from a simple reminder to a threat of court action.

### Key functionality:

- + Automated workflow system
- + Accounts rendered sorted by date
- + Client information taken from OnePractice
- + Customisable text, e-mail and document reminder templates
- + Bulk processing of multiple accounts rendered

## onecollect

"Once OneCollect was set up at our firm, our debtors reports went from 10-12 pages to around 4 pages. I used to only have the time to follow up debtors once a month – now I can follow up three times a week, and really stay on top of it. It's just the ease of it – being able to see debtors and send text messages or emails with the click of a button is amazing."

- Aimee Young, Practice Manager, Queen City Law, Auckland

OneCollect integrates seamlessly with the OneLaw suite, pulling relevant client and matter information into your reminders. It utilises proven technology to access all data between modules, allowing you to automate more document content than previously available in other systems.

The customisable email, document and text message templates allow your firm to achieve consistency in branding. Customisable templates can be varied in intensity, from a simple reminder to a threat of court action, depending on the unique needs of your firm.

Text messaging – one of the features of OneCollect- can be particularly useful when collecting unpaid fees, as a message is much harder to ignore than an email. Text messaging service costs are included within the monthly fee (reasonable use applies). SOFTWARE DEMO You can see a full demonstration of our software.

including OneCollect, <u>here</u>.
